BILL RUNS TO THE DOCTORS FOR SOME MEDICINE FOR HIS FATHER'S

HEADACHE .

Ye Towne Gossip.

And cleaning floors.
And swerping rugs.
And endless wors.
Is what they pay.
For having to themselves,
The man they love.
And perhaps the loy.
Of little soft arms.
About their neckin.
And toddling feet.
With little pink toes.
Just tell her that.
This girl you love.
And if she doesn't weaken.
Ge find somebedy clas.
I thank you.

Commission to the state of

PRICES will keep going up so long as people buy 4s liberally at advanced prices as they did before the big increases were made. This truth is illustrated by the action of New York theater managers in deciding on a uniform tirket rate of \$5 for man season. Last fall they raised prices from \$1.50 to \$2.50 to \$3.50. In spite of this advance, they found the demand for tickets greater than ever before Thus encouraged they now announce a further advance, this time far in excess of the previous increase.

Theater goern made no protest at last fall's advance, so their patrons have to part with a \$5 hill every time they need an evening's diversion. The cheerful way in which the safe was accepted has convinced the managers that the people have plenty of manny and want to epend it.

Some objection has been raised to the \$5 proposal, but not from the patrons. W. A. Brady, cane of the biggest producers and managers, fears that high rate will kill the theater. He even says rates should be lowered, instead of advanced. He hases his conviction, not on the theory that more money could be made at the lower rate, for he frankly admits this is not true, but liosking ahead he seen the most.

the demand shove normal, more than the difference in pro-duction must be made up by imports.

Europe gets the sugar she needs by going into the mar-ket for it and by bidding higher than other buyers. Inse-much as our own imports of sugar for the fiscal year end-ing June 30, 1920, estimated on the experience of 10 months of that year will be 625,000 tons greater than they were in 1879 and total 4,500,000, we are forced into the market as Europe's most formidable competitor. The increased do-mestic crop exerts no downward pressure on the sugar price of the cases that our demands exceed by 4,500,000 tons for the reason that our demands exceed by 4,500,000 tons

Counteracting somewhat the underproduction in Europe

is the ater. He even says rates should be lowered, instead of advanced. He bases his conviction, not on the theory that more mensy costid be made at the lower rate, for he frankly admits this is not true, but looking ahead he sees the possibility of the theater becoming merely a rich man's club from which persons who now attend for the love of the dramatic art would be barred.

The theater is a luxury, not a necessary, but is a luxury which the average man would be loth to give up. And it the man of moderate means is forced to confine his amusement to motion picture shows, while only the wealthy can see the plays of the real stage, discontent will be increased. There are a lot of prices that are more important to the average man these days than the price of theater tikets, but the New York proposal gives a clue on hew to bring down prices generally. So long as people are willing the juxury of expect hittle, if any relief. American business seems intent on making all that can be made while the making is good, letting the future take care of this.

If there were more men in other lines of business with the foresight of W. A. Brady, the future take care of competition to buy at any price has sent the price to a nurreasonable height. The only remedy is to buy less sugar, and that is not much of a remedy.

Europe requires more sugar from other countries than has seven required before. In 1914 Europe produced 8,185,000 tons of sugar, marely beet. In the carrent crop years, according to figures made public by the National City years, according to figures made public by the National City years, according to figures made public by the National City years, according to figures made public by the National City years of the sugar she not on the commend the rown sugar supply. With the demand above normal, more than the difference in production must be made up by imports, as Europe kabitually commend her own sugar supply. With the demand above normal, more than the busers haven.

Europe gets the sugar she neces by going into

"On to Havana," will be the cry of the international rumbounds if Juntes goes dry.

When there is naught else to inspire the Scottish bard, he takes his lyre, and sings about the heather, and oftentimes I envy him; for when my stock of themes is alim, I've nothing but the weather. Today my head is working wrong, I eximit chant a decent song, my thoughts all run together; and I've nothing in the weather. And yet there's nothing else, ods fish! Their's nothing else, though much I wish to write some deathless stances; you may have other themes in mind; the weather's all that I can find, out here in bleeding Kansas. The weather comes, the weather goes; sometimes it rains, sometimes it snows, again it ups and freezes; and it embraces all there is of thaws that melt, of sterrass that whir, of togs and mists and breezes. I've worn the weather out, I fear; I've sung about it, year by year, in high and burning phrases; I've saved about it when 'twas cold, and I've rearred up, to paw and scold, when it was for the was to be and occurred in the gutter in the presence of a number of boarders, who manifested eagerness to return forthwas not as blazes. It's saved my bacon many times, when I looked round for manifested eagerness to return forthwas not as blazes. It's saved my bacon many times, when I looked round for the surface one is not thus bereft of one's liquor.
